00 START HERE

LOAD / INSPECT

Load 00_START_HERE.pdf only. Inspect the relevant approved references below, with their governance metadata. Do not load unrelated sheets.

PURPOSE

Learn the ordered workflow before creating personal Subject or Theme.

WHAT THIS STAGE GOVERNS

The sequence and conversational process.

WHAT THIS STAGE DOES NOT GOVERN

Personal identity, a mandatory costume, or an automatic image generator.

BOUNDED CONCEPTS

This is a static Art Director for expressing concrete production decisions to an oriented production agent. Start by loading 00_START_HERE.pdf, this file. Load ONE numbered stage at a time. Do not preload all documents or all exemplar sheets. Follow the exact NEXT FILE instruction after each synthesis.

Orientation happens before Subject/Theme creation. Stages 01–07 teach bounded visual concepts by making images and receiving artist critique. Stage 08 negotiates the artist’s Subject from their exemplars. Stage 09 negotiates a portable Theme. Stage 10 establishes the simplest useful Subject + Theme calibration. Open the HTML Art Director only after that calibration is accepted.

The Art Director does not generate artwork or replace the conversation. CREATE PROMPT and CREATE JSON express the same concrete production snapshot. Paste either into the oriented agent, alongside broader conversational direction.

APPROVED REFERENCES

Originals are included only in the local orientation review ZIP/full development package. The public candidate keeps explicit reference metadata and omits unresolved binaries. Rights declarations are not inferred from artistic approval.

VISUAL EXERCISE

No artwork is required in this introductory stage. Restate the workflow and identify the first substantive visual exercise.

Restate the bounded concepts before making the image(s). Preserve supplied approved exemplar bytes; the exercise is a new study, not a replacement for an approved original.

USER FEEDBACK

Ask the artist for critique. Record only explicitly stated preferences; do not fabricate likes or dislikes. Revise conversationally when needed, without PASS / RETRY gates. Print the final synthesis after reconciling the critique.

STAGE CONTEXT SYNTHESIS

This synthesis forces the agent to retrieve, reconcile and reason over active context before proceeding. The user need not read every line unless they want to audit or correct the agent. Label statements SYSTEM RULE, USER PREFERENCE or LOCAL EXCEPTION where useful. Distinguish observed evidence from uncertainty.

- What this stage taught me: Fill from actual evidence and the artist’s conversation; state “not recorded” where appropriate.
- What I observed in the generated image(s): Fill from actual evidence and the artist’s conversation; state “not recorded” where appropriate.
- What the artist explicitly liked: Fill from actual evidence and the artist’s conversation; state “not recorded” where appropriate.
- What the artist explicitly disliked: Fill from actual evidence and the artist’s conversation; state “not recorded” where appropriate.
- Approved exemplars or features: Fill from actual evidence and the artist’s conversation; state “not recorded” where appropriate.
- Rejected features / failure patterns: Fill from actual evidence and the artist’s conversation; state “not recorded” where appropriate.
- What must remain stable: Fill from actual evidence and the artist’s conversation; state “not recorded” where appropriate.
- What may vary: Fill from actual evidence and the artist’s conversation; state “not recorded” where appropriate.
- What should carry forward: Fill from actual evidence and the artist’s conversation; state “not recorded” where appropriate.
- What must NOT be generalized: Fill from actual evidence and the artist’s conversation; state “not recorded” where appropriate.
- Remaining uncertainty: Fill from actual evidence and the artist’s conversation; state “not recorded” where appropriate.
