02 VISUAL LANGUAGE

LOAD / INSPECT

Load 02_VISUAL_LANGUAGE.pdf only. Inspect the relevant approved references below, with their governance metadata. Do not load unrelated sheets.

PURPOSE

Recognize the approved graphic visual language.

WHAT THIS STAGE GOVERNS

Rendering families and environment abstraction.

WHAT THIS STAGE DOES NOT GOVERN

A fixed palette, Subject, Theme or pose.

BOUNDED CONCEPTS

Inspect Categories 11 and 12 only. Distinguish overall illustration/print family from the amount of environmental description. Graphic simplification should retain readable form and deliberate edges. An abstract field and a descriptive setting are separate choices; neither dictates identity.

Restate observed relationships using the approved material. Do not invent a mandatory rendering style from one attractive example. Transfer the assigned graphic behavior, not the depicted person, costume or story.

APPROVED REFERENCES

Originals are included only in the local orientation review ZIP/full development package. The public candidate keeps explicit reference metadata and omits unresolved binaries. Rights declarations are not inferred from artistic approval.

VISUAL EXERCISE

Make a small comparison of the same neutral object: simplify environment while holding viewpoint, palette and object silhouette stable. Keep any change in rendering separately identified.

Restate the bounded concepts before making the image(s). Preserve supplied approved exemplar bytes; the exercise is a new study, not a replacement for an approved original.

USER FEEDBACK

Ask the artist for critique. Record only explicitly stated preferences; do not fabricate likes or dislikes. Revise conversationally when needed, without PASS / RETRY gates. Print the final synthesis after reconciling the critique.

STAGE CONTEXT SYNTHESIS

This synthesis forces the agent to retrieve, reconcile and reason over active context before proceeding. The user need not read every line unless they want to audit or correct the agent. Label statements SYSTEM RULE, USER PREFERENCE or LOCAL EXCEPTION where useful. Distinguish observed evidence from uncertainty.
