# 07 PRODUCTION WORKFLOW AND FEEDBACK

## LOAD / INSPECT

Load 07_PRODUCTION_WORKFLOW_AND_FEEDBACK.pdf only. Inspect the relevant approved references below, with their governance metadata. Do not load unrelated sheets.

## PURPOSE

Practice production and feedback without promoting history into canon.

## WHAT THIS STAGE GOVERNS

Shared production snapshots, project memory and scoped critique.

## WHAT THIS STAGE DOES NOT GOVERN

Automatic approval, rerolling saved decisions or formal PASS/RETRY tests.

## BOUNDED CONCEPTS

After final calibration, configure image direction in the Art Director and create a Prompt or JSON. Both outputs consume one resolved ProductionSpec; they must not independently reinterpret editable state. Random and inherited choices become concrete before production. Save does not reroll them.

Save Project preserves editable project state, available resolved production, feedback, exemplar originals and generation history. Load validates atomically. Incomplete Subject/Theme projects can still be saved without fabricating ProductionSpec. Global user presets remain separate. Artistic advisories do not prevent Save or Load.

History is evidence, not authority. Record liked/disliked features, next change, endorsement and its scope. Reload guidance asks the oriented agent to inspect the dossier and context, then provide an Understanding Check conversationally. Exact originals and JSON/TXT remain authoritative where thumbnails or PDF presentation simplify display.

## APPROVED REFERENCES

Category 01: packs/official/01-subject-identity/manifest.json. Inspect governance before transferring features. Do not import the depicted identity or Theme outside its assigned authority.

- Subject Identity Exemplars: packs/official/01-subject-identity/exemplars/category-01-approved-sheet.png; SHA-256 bbaf4c806a80a197d833be2eb46b00fa87530a50ab30f7542586db41e8b0de75.

Category 10: packs/official/10-theme-costume-transformation/manifest.json. Inspect governance before transferring features. Do not import the depicted identity or Theme outside its assigned authority.

- Theme / Costume Transformation Exemplars: packs/official/10-theme-costume-transformation/exemplars/category-10-approved-sheet.png; SHA-256 009a4a0c2f61121d0c4cf56c7aadc9b066d90a9361dd10bcc4624f8e9dc9e375.

Originals are included only in the local orientation review ZIP/full development package. The public candidate keeps explicit reference metadata and omits unresolved binaries. Rights declarations are not

inferred from artistic approval.

## VISUAL EXERCISE

Create one controlled revision of an earlier neutral study from a short artist critique. Record what changed, what remained stable, and what must not become general canon. Explain how its future history record would preserve its originating production snapshot.

Restate the bounded concepts before making the image(s). Preserve supplied approved exemplar bytes; the exercise is a new study, not a replacement for an approved original.

## USER FEEDBACK

Ask the artist for critique. Record only explicitly stated preferences; do not fabricate likes or dislikes. Revise conversationally when needed, without PASS / RETRY gates. Print the final synthesis after reconciling the critique.

## STAGE CONTEXT SYNTHESIS

This synthesis forces the agent to retrieve, reconcile and reason over active context before proceeding. The user need not read every line unless they want to audit or correct the agent. Label statements SYSTEM RULE, USER PREFERENCE or LOCAL EXCEPTION where useful. Distinguish observed evidence from uncertainty.

- What this stage taught me: Fill from actual evidence and the artist’s conversation; state “not recorded” where appropriate.
- What I observed in the generated image(s): Fill from actual evidence and the artist’s conversation; state “not recorded” where appropriate.
- What the artist explicitly liked: Fill from actual evidence and the artist’s conversation; state “not recorded” where appropriate.
- What the artist explicitly disliked: Fill from actual evidence and the artist’s conversation; state “not recorded” where appropriate.
- Approved exemplars or features: Fill from actual evidence and the artist’s conversation; state “not recorded” where appropriate.
- Rejected features / failure patterns: Fill from actual evidence and the artist’s conversation; state “not recorded” where appropriate.
- What must remain stable: Fill from actual evidence and the artist’s conversation; state “not recorded” where appropriate.
- What may vary: Fill from actual evidence and the artist’s conversation; state “not recorded” where appropriate.
- What should carry forward: Fill from actual evidence and the artist’s conversation; state “not recorded” where appropriate.
- What must NOT be generalized: Fill from actual evidence and the artist’s conversation; state “not recorded” where appropriate.
- Remaining uncertainty: Fill from actual evidence and the artist’s conversation; state “not recorded” where appropriate.
