10 CALIBRATION AND UI HANDOFF

LOAD / INSPECT

Load 10_CALIBRATION_AND_UI_HANDOFF.pdf only. Inspect the relevant approved references below, with their governance metadata. Do not load unrelated sheets.

PURPOSE

Confirm Subject + Theme, then hand off advanced direction to the UI.

WHAT THIS STAGE GOVERNS

Final simple calibration, working-pack references and production handoff.

WHAT THIS STAGE DOES NOT GOVERN

Elaborate effects hiding identity errors or replacement of the artist’s broader conversation.

BOUNDED CONCEPTS

Ask: “Do we now have the correct Subject expressed as the correct Theme?” Make the simplest useful calibration; do not bury it under elaborate effects. Resolve the artist’s critique conversationally.

Once accepted, freeze/reference the working Subject Pack and working Theme Pack, including their authority, protected features, optional features and scoped exceptions. Preserve approved originals rather than regenerate them. This working agreement remains amendable by explicit artist direction, not by unnoticed history promotion.

Open the local HTML Art Director using the README instructions (npm run dev, then the displayed local URL), or an explicitly authorized hosted installation when available. Establish the calibrated Subject/Theme references in the workspace. Use the 11 tabs, global/per-panel overrides and Panel Variation Logic to configure production. CREATE PROMPT produces human direction; CREATE JSON produces structured direction from the same concrete snapshot. Paste the chosen output into the oriented agent. Broader instructions, revision and critique stay conversational. Save a personal project when useful.

APPROVED REFERENCES

Category 01: packs/official/01-subject-identity/manifest.json. Inspect governance before transferring features. Do not import the depicted identity or Theme outside its assigned authority.

- Subject Identity Exemplars: packs/official/01-subject-identity/exemplars/category-01-approved-sheet.png; SHA-256 bbaf4c806a80a197d833be2eb46b00fa87530a50ab30f7542586db41e8b0de75.

Category 10: packs/official/10-theme-costume-transformation/manifest.json. Inspect governance before transferring features. Do not import the depicted identity or Theme outside its assigned authority.

Originals are included only in the local orientation review ZIP/full development package. The public candidate keeps explicit reference metadata and omits unresolved binaries. Rights declarations are not inferred from artistic approval.

VISUAL EXERCISE

Create one minimal accepted Subject + Theme calibration. After artist satisfaction, state the frozen working-pack references and demonstrate a simple multi-panel Art Director brief without changing identity or Theme authority.

Restate the bounded concepts before making the image(s). Preserve supplied approved exemplar bytes; the exercise is a new study, not a replacement for an approved original.

USER FEEDBACK

Ask the artist for critique. Record only explicitly stated preferences; do not fabricate likes or dislikes. Revise conversationally when needed, without PASS / RETRY gates. Print the final synthesis after reconciling the critique.

STAGE CONTEXT SYNTHESIS

This synthesis forces the agent to retrieve, reconcile and reason over active context before proceeding. The user need not read every line unless they want to audit or correct the agent. Label statements SYSTEM RULE, USER PREFERENCE or LOCAL EXCEPTION where useful. Distinguish observed evidence from uncertainty.

- What this stage taught me: Fill from actual evidence and the artist’s conversation; state “not recorded” where appropriate.
- What I observed in the generated image(s): Fill from actual evidence and the artist’s conversation; state “not recorded” where appropriate.
- What the artist explicitly liked: Fill from actual evidence and the artist’s conversation; state “not recorded” where appropriate.
- What the artist explicitly disliked: Fill from actual evidence and the artist’s conversation; state “not recorded” where appropriate.
- Approved exemplars or features: Fill from actual evidence and the artist’s conversation; state “not recorded” where appropriate.
- Rejected features / failure patterns: Fill from actual evidence and the artist’s conversation; state “not recorded” where appropriate.
- What must remain stable: Fill from actual evidence and the artist’s conversation; state “not recorded” where appropriate.
- What may vary: Fill from actual evidence and the artist’s conversation; state “not recorded” where appropriate.
- What should carry forward: Fill from actual evidence and the artist’s conversation; state “not recorded” where appropriate.
- What must NOT be generalized: Fill from actual evidence and the artist’s conversation; state “not recorded” where appropriate.
- Remaining uncertainty: Fill from actual evidence and the artist’s conversation; state “not recorded” where appropriate.
